# THE PROTOCOL

- Invest
  - Send ETH and receive LUNI (LUNI is being minted at 1 ETH = 10.000 LUNI)
  - ETH used to invest is given as “rewards” to LUNI holders according to each holder’s “stake”
  - A LUNI holder’s “stake” is the percentage of LUNI held, out of entire LUNI supply
- Rewards
  - Rewards can be withdrawn directly from the portal to your wallet
  - From each reward, [3%] is collected as “Liquidity Pool fee”
- Withdraw
  - A “lockdown period” of [12 hours] needs to pass, so rewards are withdrawable
- Reinvest
  - Instead of withdrawing the rewards, you might reinvest them for more LUNI
  - For reinvesting rewards, there is no “lockdown period”

# THE PROMISE

- Liquidity Pool
  - Will be used to buy LUNI from the open market
  - This will help stabilize the LUNI price
- Burning
  - LUNI bought with funds from the Liquidity Pool are burned
  - Burning LUNI increases the “stake” of everyone
- Conclusion
  - Invest in LUNI, earn rewards from other people investing in LUNI
  - Do you really care that it’s a Ponzi Scheme, if you’re among the first to join?
- DEFINITELY NOT A RUG PULL
  - This is the promise 😊
